Please include Assignee name and address in published application as follows:

Vascular Therapies, LLC  
New York, New York

This patent application is a continuation of prior Application No. 10/431,737, filed on May 8, 2003, which is a continuation of prior Application No. 10/051,708, filed on January 16, 2002. The entire disclosure of the prior applications is considered as being part of the disclosure of the accompanying application and is hereby incorporated herein by reference.

This application (and its parent and grandparent noted above) claim the benefit of prior filed provisional patent application number 60/262,132, filed on January 16, 2001. The entire disclosure of the previously filed provisional application is also incorporated by reference herein.

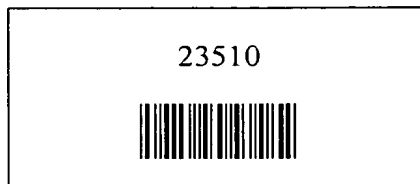

Notation of Possible Interfering Subject Matter

In accordance with the Rules, claims 37-57 of this application in the concurrently filed Preliminary Amendment are verbatim copies of claims 1-21 of Fischell *et al.* U.S. Patent 6,534,693.

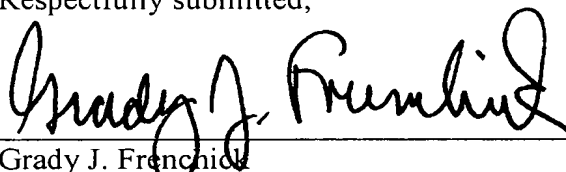

In accordance with the Rules, claims 58-62 of this application in the concurrently filed Preliminary Amendment are verbatim copies of claims originating from Fischell *et al.* U.S. Patent Application Publication US2002/0055701A1 published May 9, 2002. Those claims were moved into the parent of this application (*i.e.*, S.N. 10/431,739), per a Second Preliminary Amendment mailed January 21, 2004 from S.N. 10/435,515 filed May 9, 2003. This continuation application is being filed out of an abundance of caution to determine whether, in fact, interfering subject matter exists between the aforementioned Patent Application Publication and this continuation application.

The parent application and this continuation application are assigned to Vascular Therapies, LLC.
